

# Help Johnny and others fighting blood cancer!

Johnny is a 28 year old young man suffering from **blood cancer**. Only a bone marrow transplant can save his life and therefore we need your help!

Johnny used to enjoy playing basketball at a high level, then a severe disease radically affected his young life. He was only 17 years old then and bravely managed to regain his health.

10 years later, he has been diagnosed with leukemia and this time urgently needs your help and support! The second battle begins! His mother is German and his father is Indonesian and this combination makes the search for a suitable bone marrow donor even more complicated!

Johnny needs someone who shares the same or a similar ethnic background (Asian- Caucasian) to save his life – if these criteria fits you or someone you know, please register as a bone marrow donor!

## Register as blood stem cell donor!
